Silhouet-Tone®

At the heart of the day-to-day lives of professional estheticians since 1965

The creation of Silhouet-Tone's furniture division was born from the desire to share our passion for furniture and service with our customers. We have been transforming the workspace of beauty professionals since 1965, by combining functionality with creative inspiration, quality with accessible comfort, and exclusive design with affordable prices.

Our inspiration is supported by five major strengths.

A “Made in North America” design with no outsourcing of any sort

Our spa and esthetic furniture is entirely designed and manufactured in Canada.

Ergonomic and modern design

Innovating since 1965, our team of experts bring knowledge and philosophy built up over 50 years to the spa industry. Our expertise is reflected in each piece of furniture we design and create.

Proven quality

Silhouet-Tone's quality management systems have achieved ISO 13485:2003 certifications. Upon request, we can also comply with California Flammability Standards (California Technical Bulletin 133). With this guarantee of quality, Silhouet-Tone easily exceeds the competition.

Eco-friendly approach

Our production methods are based on support for the use of certified raw materials, as we are well aware of the growing importance of the environment with regards to our common future. Silhouet-Tone therefore incorporates this philosophy in the design of all its products, particularly in its wood panels which are FSC*-certified.

Constructive collaboration

Whether you work in a spa, beauty salon, med-spa, or clinic, Silhouet-Tone calls on hundreds of beauty professionals each year in an effort to better understand individual needs and aspirations. Through this network of collaborators, we are able to offer unique furniture designs that allow each professional to imagine an indoor space that truly reflects who they are. Over the years, our collections have evolved, always keeping pace with our customers' expectations. Whether you have a small workspace or an unlimited budget, should you need versatile furniture or extravagant comfort, our equipment specifications can be tailored to your needs and those of your clients. There is no better way to promote your company than having customers expressing how pleased they are with the level of comfort and service received.

CUSHIONS

DESIGN

The backside of each cushion is lightly padded for optimal ergonomics. The space between each micro cushion allows for allows for optimal airflow so the upholstery can breathe properly, while encouraging the elimination of unpleasant odors.

STITCH WORK

Our sewing method uses unbreakable Kevlar thread, among other things, to reinforce and strengthen weak points typically located where weight and rubbing take their toll. Our experienced tailors change their needles every 2-3 days. This ensures consistent and accurate stitching and helps prevent skipped stitches, resulting in exceptionally durable seams.

FOAM

In accordance with American standards, our environmentally-friendly foam contains no CFCs, no insecticides and no formaldehyde. It is also free of fillers, typically used to reduce costs but results in an irregular and sagging appearance. Our high resiliency foams offer an unparalleled comfort and return pressure exerted by the weight so that the cushion get its original shape back after being compressed. Our high density foam is integrated in our cushions to prevent them from collapsing, thus ensuring long-term consistent quality.

MOTORS

Our European-made motors meet international electrical safety standards and are TÜV or UL® certified. They also comply with the European Union's technical standards and are CE marked.

Our whisper-quiet motors allow gentle and extremely precise angle adjustments, with slow starts and stops to prevent jarring and abrupt movements.

STRUCTURE

METAL

Our steel-framed furniture is made of 12G or 14G steel, making it rock solid, stable and durable. We use metal which has undergone several processes in order to meet RoHS compliance.

WOOD

Our top-quality FSC-certified wood is sourced from environmentally conscious and sustainable logging companies. We use computerized cuts to reduce waste. Furthermore, bolt entry points are reinforced with steel plates, protecting the wood from rubbing and instability. Under our cushions, we use 1.9 cm of solid ash, unlike many competitors who use as little as 0.63 cm. Proof that the quality of Silhouet-Tone products far exceeds the competition.

TAFISA

TAFISA® Canada's decorative panels (TFL) are manufactured using 100% recycled and recovered wood material. Meticulously selected to create high quality, consistent panels for furniture. HPL panels are manufactured in two steps. The first consists of thermofusing the wear and decorative layers to multiple layers of kraft paper to form a single laminated sheet. Steel press plates are used to create the surface texture. The sheet is then bonded to a substrate (particleboard, MDF or other) by the end-user to create a finished product.

QUALITY & DURABILITY

Our furniture, created in-house by our team of professionals that includes engineers and designers, is made in our very own facilities. From developing to fine-tuning our prototypes and manufacturing our finished products, we select only the finest materials known for their quality and durability. Supported by years of experience, and by the control we have over all stages of the manufacturing process, we oversee everything down to the last details, including the upholstery process. This enables us to provide our clients with nothing less than the highest quality products.

ELITE COLLECTION

The Elite collection is Silhouet-Tone's most sophisticated range of treatment chairs. With a stable structure and adjustable legs for uneven floors, its sophisticated design blends with any décor and will add a unique touch of refinement to your working space.

Covering a comprehensive range of treatments, it features four models addressing specific types of care:

ELITE PLATINUM: Designed for medical clinics and specialized beauty care centers and spas, this chair provides beauty professionals with multiple seating options ranging from completely upright to Trendelenburg position. The ELITE PLATINUM is a must-have for all facial care and décolleté treatments. It is also convenient for laser procedures, IPL, injections, and microdermabrasion. Featuring an ergonomic design, the ELITE PLATINUM is perfect for use over long shifts, providing unparalleled comfort for both the operator and client.

ELITE SILVERSTAR: Featuring a 360-degrees rotation, this chair is intended for facial care, medical esthetic treatments and make up application. Simple yet elegant, the ELITE SILVER STAR is the perfect chair for all your facial treatments while providing unparalleled comfort for waxing.

ELITE BRONZE: The ELITE BRONZE is a must-have for electrologists. Cozy and ergonomic, this chair carries multiple positioning options while allowing to adjust the height using a hydraulic piston. With a generous 3 inch cushion padding for added comfort, the ELITE BRONZE will delight you and your clients.

ELITE MD100: A first-class chair intended for medspas, the ELITE MD-100 is the chair of choice for professionals offering medical esthetic treatments. It features fully electrical movements along with adjustable and removable stirrups and arm rests, making it a luxurious and convenient experience for both the professional and their patient.

ELITE PLATINUM

STYLE AND CONVENIENCE, 4 MOTORS
ERGONOMIC AND COMFORTABLE

Four whisper-quiet motors and smooth controls allow for simultaneous adjustments without jarring or abrupt movements. This luxurious and well-appointed chair is convenient for the esthetician and the client. The Elite Platinum is perfect for face, laser and IPL treatments, waxing, as well as medical esthetic type treatments: injections, pressure therapy and permanent makeup.

ELITE PLATINUM

412256

Anatomical, three-way adjustable headrest for optimal client positioning

Ergonomically designed and easy to retract armrests that swivel 360°

Bluetooth® wireless remote control for easy and accurate positioning

Tilting seat to 45°

Back and footrest adjustable to 80°

Four quiet, European-made, TÜV or UL® certified motors (internationally recognized certifications)

Thickness of cushion padding: 3.5 in

Adjustable legs for uneven floors

All upholstered corners are rounded: designed to optimize the technician's movements

Exceptional ergonomic base design for optimal stability

NEVADA PREMIUM

ELEGANCE AND REFINEMENT

With a new Tafisa finish for its frame, available in a variety of four colors, the Nevada Premium is perfect for facial or body care treatments, hair removal, massaging and more. Sturdy, this table is highly stable, resting on four columns, one on each corner. The Nevada Premium features a crossbar for safety allowing to go up and down by using a foot pedal that keeps the therapist hands-free, preserving the contact with the client during the treatment. The Nevada Premium provides a storage space for your supplies and may be ordered with a single drawer. It also offers a great storage area for your towel warmer. The wireless Bluetooth remote control with memory included with this chair will give you greater freedom of movement, a more efficient way of working and additional operational security.

LAGUNA COLLECTION

Combining comfort and ergonomics, the Laguna is the professional's favorite choice when it comes to selecting the perfect multifunctional treatment table. Convenient for a wide range of face and body care including makeup and pedicure due to the versatility of position adjustments, the Laguna tables are also ideal for massage therapy due to their unparalleled stability. Their functional and durable design allow to perform a variety of movements enabling the therapist to work closer to their patient.

The elegance and refinement of this model will easily blend into any décor with a full choice of colors, helping to create a personalized and unique treatment space.

Covering a comprehensive range of treatments, it features thow models designed for specific types of care: MIST and FLEX.

LAGUNA MIST

POWERFUL AND VERSATILE
3 ELECTRIC MOTORS

With its exceptional reliability, the LAGUNA MIST is best suited for facials, massages, or any other types of body treatments. This bed raises the client experience by providing ultimate comfort through enhanced positioning in both 29-inch and 32-inch models. The system, with its three certified quiet motors, ensures relaxation and allows all adjustments to be smooth and quiet. The wireless Bluetooth remote control with memory included with this chair will give you greater freedom of movement, a more efficient way of working and additional operational security.

BOLSTERS

BOLSTERS

SPECIALTY COLLECTION

1 412374

This large scalene triangle assists in a number of conditions, such as vertigo, acid reflux, post-orthopedic procedure, COPD (Chronic Obstructive Pulmonary Disease), and many more.

• 10" X 27"

3 412382

This unique house like shape helps is the most stable of all the bolsters. With two height options while working side-lying, this bolster is a perfect example of versatility.

• 7" X 8.5" X 24"

7 412380

This model features a cervical contour at its end making it ideal for resting and supporting clients head and neck. More hygienic than having pillows in the treatment rooms, this bolster completes the spa experience.

• 3" X 14" X 11"

9 412373

Larger breast can become uncomfortable while lying prone this unique design helps create a more comfortable experience.

• 3" X 18.5" X 21"

6 412371

Over-sized bolsters like these are excellent additions for Lymphatic Drainage or other specialty technique that requires elevation of the extremity above the rest of the body. With its flat bottom side-lying position becomes more comfortable.

• 7.25" X 9" X 26"

8 412372

This three-quarters round offers the comfort of a round bolster with the added stability of a half flat bottom bolster, making it ideal for the all-around therapist.

• 4" X 4.75" X 26"

4 412383

Allows the convenience of a single location bolstering, whether it's a little lumbar support or more stability to a problematic ankle.

• 3" X 6" X 13"

10 412377

This half bolster features a flat bottom and is sure to stay still even through those sessions full of Stretching & ROM technique. Longer than most bolsters it is ideal for wider clients.

• 4.5" X 9" X 29"

13 412379

This half bolster features a flat bottom and is sure to stay still even through those sessions full of Stretching & ROM technique.

• 3" X 6" X 26"

2 412376

Over-sized bolsters like these are excellent additions for Lymphatic Drainage or other specialty technique that requires elevation of the extremity above the rest of the body.

• 8" X 26"

5 412378

Considered to be the icon of bolsters, this standard size bolster makes the perfect addition to any spa treatment room.

• 6" X 26"

11 412375

The largest of the round bolsters. This model is best used on athletes as well as taller, larger framed clients.

• 9" X 26"

12 412381

The shorter length allows for one extremity to be comfortably stabilized while the other extremity is treated.

• 7" X 20"
